

Patient Information Sheets

Chemotechnique have a 'Patient Information Sheet' for each individual hapten that is available in the Chemotechnique range.

An example of the Nickel(II)sulphate hexahydrate (N002) is on the back of this sheet.

You can find a 'Patient Information Sheet' by going on the Chemotechnique website: -

1. Go to www.chemotechnique.se
2. Press 'Login' in the upper right corner of the home page and then log in. If you are a first time user, create a login by clicking on 'Create Account' and registering your details for free access to the Chemotechnique website information.
3. Once logged in, on the right hand side of the screen is 'Search the database' and you can type in the code for the item you want or the name (or partial name) of the item. A list of possibilities may come up and click on the one you want.
4. On the description of the item you want, click on the  symbol, choose the language you want and the information sheet will open.
5. Once the document is open, you can print off the document to give to the patient for their information and/or save it for future reference.

The screenshot shows the Chemotechnique website interface. At the top, there is a navigation menu with links for Home, About us, Contact Allergy, Patch Testing, Products, and How to buy. A search bar is located on the right side of the menu. Below the menu, there is a large video player showing a person's arm with a patch test being applied. The video is titled "The trusted name in Patch Testing". Below the video, there are two columns of text. The left column is titled "The trusted name in Patch Testing" and describes the company's history and services. The right column is titled "Are you getting a Patch Test?" and provides information about the patch test process. At the bottom, there is a section titled "Chemotechnique partner page" with a link to access the partner page for corporate news and marketing resources.

PATIENT INFORMATION SHEET

Nickel(II)sulfate hexahydrate

(N-002A, N-002B)

Your patch testing results indicate that you have a contact allergy to **Nickel(II)sulfate hexahydrate**. It is important that you familiarize yourself with this chemical and take steps to avoid coming in contact with it.

i

What is **Nickel(II)sulfate hexahydrate** and where is it found?

This chemical has numerous household and industrial applications. It is found in coins, jewelry, eyeglasses, utensils, metal buttons, keys, paper clips, enamel dyes, pigment for paint and wallpaper and electrical wiring. It is also used as a fuel additive. Further research may identify additional product or industrial usages of this chemical.

i

What else is **Nickel(II)sulfate hexahydrate** called?

This chemical can be identified by different names, including:

Blue salt, Carbonyl nickel powder, Nickel, Nickel (II) Sulfate Hexahydrate, Nickel monosulfate hexahydrate, Nickel sulfate hexahydrate, Sulfuric acid, nickel (2+) salt, hexahydrate, Single nickel salt

This may not be a complete list as manufacturers introduce and delete chemicals from their product lines.

THINGS YOU CAN DO TO HELP MANAGE YOUR CONTACT ALLERGY

- Be vigilant... read the product label.** Always take the time to read the ingredient listing on product packages. This should be your first step each time you purchase a product as manufacturers sometimes change product ingredients. If you have any concerns ask your pharmacist or your doctor.
- Test the product first.** If you have purchased a new product you should test it on a small skin area to see if you get a reaction before using the product on larger skin areas.
- Advise people you obtain services from of your contact allergy.** This should include people like your pharmacist, doctor, hairdresser, florist, veterinarian, etc.
- Inform your employer if the source of your contact allergy is work related.** You should identify the specific source of the chemical and take the necessary steps to avoid further exposure. Protective wear may be adequate or you may need to make a change in your work activities. Both you and your employer benefit when the cause of your occupational dermatitis is eliminated.
- "Google" it.** The internet is an excellent source of ingredient information that can be searched by product, by company and by specific chemical. Some helpful independent internet links include: www.nlm.nih.gov/pubs/factsheets/factsheets.html (U.S. Dept. of Health and Human Services; alphabetic list) www.nlm.nih.gov/pubs/factsheets/factsbj.html (U.S. Dept. of Health and Human Services; subject list) www.cosmeticsinfo.org (Cosmetic Industry Category Ingredient Database) www.whatsinsidescjohanson.com (information on all S.C. Johnson product ingredients)

If you have any future contact dermatitis concerns or questions, please call the doctor's office.
